

Naresh Challa – DevOps Engineer

✉ Email: naresh.devops96@gmail.com | ☎ 9885636607 | 📍 Bangalore, India

Professional Summary

Results-driven DevOps Engineer with over 5+ years of experience in cloud automation, infrastructure management, and CI/CD implementation. Skilled in optimizing deployments using AWS, Azure, Jenkins, Docker, Kubernetes, Helm Charts Terraform, and Ansible. Experienced in monitoring and troubleshooting production systems with tools like Prometheus, Grafana, and ELK. Adept at scripting in Python and Shell, and integrating data platforms like Databricks and HDFS. Passionate about automation, scalability, and working in fast-paced, innovation-driven environments.

Technical Skills

Cloud Platforms: AWS, Azure

DevOps Tools: Jenkins, GitHub Actions, Terraform, Ansible, Docker, Kubernetes, AzureDevOps, GitHub Administration, CostManagement, Incident Management

Monitoring & Logging: Prometheus, Grafana, ELK Stack, [Logz.io](https://logz.io), UptimeRobot, NewRelic

Programming & Scripting: Python, Shell Scripting

Big Data Tools: Databricks, HDFS

Version Control: Git, GitHub, BitBucket

Other Expertise: CI/CD Pipelines, Infrastructure Automation, Cloud Cost Optimization, Production Support, Nexus

Professional Experience

DevOps Engineer II | Sigmoid Analytics | Bangalore, India | Aug 2025 – Present
Project Trade Promotion Optimization (TPO)

- Led DevOps for a **7-microservice (TPO)** platform deployed on **Azure Kubernetes Service (AKS)** with secure, scalable microservice architecture.
- Built a **universal reusable Helm chart framework** enabling rapid deployment of multiple microservices using environment-specific values files.
- Integrated **Azure Key Vault** with CSI Secrets Store to securely inject secrets into pods, ensuring no sensitive data was stored in etcd or code repositories.
- Managed Azure components including **Blob Storage, Resource Groups, Private Endpoints, Load Balancers**, and **Azure PostgreSQL** with secure VNET integration.

- Developed and maintained CI/CD pipelines using **GitHub Actions**, **Bitbucket Pipelines**, **Jenkins**, **Git**, **Nexus**, and **SonarQube** for automated build, test, security scan, and deployment workflows.
- Managed centralized artifact storage using **Nexus Repository** for Docker images and Helm charts.
- Managed **RDS & MongoDB Atlas** performance tuning, backup automation, failover setup, and monitoring.
- Implemented Kubernetes Ingress routing, HPAs, ConfigMaps, and service-to-service security for all 7 microservices.
- Worked with **Databricks and HDFS** to support data engineering pipelines and integrate DevOps automation for data workflows.
- Ensured end-to-end project automation, security hardening, secret rotation, and production-grade infra reliability across both **AWS & Azure** ecosystems.

DevOps Engineer | Zetwerk Manufacturing Pvt. Ltd.
Bangalore, India | Oct 2021 – Aug 2025

- Designed, implemented, and maintained CI/CD pipelines using Jenkins and GitHub Actions for automated deployments.
- Managed AWS infrastructure including EC2, S3, RDS, CloudFront, and VPC setups for scalable and secure environments.
- Automated infrastructure provisioning using Terraform and Ansible, reducing manual intervention and setup time.
- Deployed and maintained containerized applications using Docker and Kubernetes, improving deployment efficiency.
- Integrated monitoring and alerting systems using Prometheus and Grafana for proactive issue detection.
- Managed log aggregation using ELK Stack to streamline debugging and incident response.
- Developed Python automation scripts for routine operational tasks, reducing manual workload by 40%.
- Enabled **AWS Cost Explorer**, created cost dashboards and custom reports, and drove **cost optimization initiatives** across cloud services through right-sizing, reserved instances, and resource lifecycle automation.
- Optimized cloud costs through right-sizing and lifecycle policies.

- Collaborated with cross-functional teams to **provision read replicas**, configure alerts, and manage schema updates for analytics and reporting workloads, enhancing data pipeline stability and scalability.
- Conducted regular **Knowledge Transfer (KT) sessions** for internal teams on DevOps tools, cloud best practices, cost optimization strategies, and database administration.
- Monitored and optimized database performance using **Amazon CloudWatch, Grafana, and MongoDB Atlas Performance Advisor**, addressing slow queries, replication lag, and connection spikes.
- Designed and enforced **IAM policies** with tag-based conditions to allow the Data Engineering team exclusive access to their respective RDS and Atlas resources without exposing other environments.
- Hosted and participated in **RCA (Root Cause Analysis)** meetings

Education

Bachelor of Technology (B.Tech) in Computer Science

Jawaharlal Nehru Technological University, Kakinada (JNTUK), 2014 – 2018
